The Positive Flow Show

Up to 90 Minutes of Educational Entertainment

Music

Music has always been an influential tool used for many decades. We use our music to help connect with our audience. Music allows for young people to get in a comfort zone that opens them up to listening and learning. We use Hip Hop beats with positive and clean lyrics. Everyone from toddlers to grandparents can enjoy our music at any time and any place.

Stories

Along with music, we share life experiences that have changed our lives. These vivid tales allow our youth to understand the importance of making the **Positive Choice**. We take the time to ask questions and focus on serious issues that are effecting our young people today. We also allow time for students to tell their stories so that others can learn from their experiences.

Skits

Our skits are created to promote self-assurance and guidance with handling situations experienced in school. They also increase audience participation. When the audience gets involved, they pay closer attention to what they see and hear. The skits also allow students, parents and others to put on their acting talents and have some fun with learning valuable lessons.

Below are just a few of the topics we discuss.

Influences	Bullying	Positive Thinking
School	Peer Pressure	Habits
Crime	Violence	Self Esteem

There are always opportunities to deal with the difficult situations life presents to us. The **Choices** we make to deal with those situations will determine the outcome of your future.

It's time for a Positive Flow!!!
